Foreword

2019 marked another successful year for the Open Medical Institute (OMI). A total of 1,285 doctors from 67 countries attended our medical seminars at Schloss Arenberg in Salzburg, expanding the OMI network to 23,197 physicians worldwide.

Encouraged by the overwhelmingly positive feedback, we continued to develop the program and created new tools for OMI fellows and alumni. We added seminar topics to the OMI Leadership curriculum, which was initially developed by the Children’s Hospital of Philadelphia, in collaboration with Maastricht University and the Institut Pasteur.

We launched a new application platform, the OMI Portal, and redesigned the OMI E-Learning Platform, making it more user-friendly. We also increased the number of hands-on training sessions during the OMI Seminars in Salzburg, thereby enabling seminar participants to learn new surgical techniques and experience the latest technology.

We started a new initiative with the Open Society Foundations to further stem the medical brain drain from Central and Eastern Europe. By establishing local Centers of Excellence in Hungary, Romania, Serbia and Slovakia and strengthening the network of medical experts West to East and East to West, we expect to foster lasting brain gain.

WOLFGANG AULITZKY, M.D.
CEO, Open Medical Institute

Open Medical Institute

Why the world needs us

As I write this letter in April 2020, the world stands united in the battle against COVID-19, while events unfold with a speed and on a scale not seen in our lifetime. After much hesitation, leaders in every country are moving aggressively to slow the pace of virus transmission and address the enormous health and economic challenges facing individuals, families, communities and organizations. Billions of people are practicing social distancing in order to contain the virus and lay the groundwork for recovery.

This unprecedented health crisis has upended our sense of security and exposed the vulnerability of societies and medical systems worldwide. COVID-19 is an assault on the very fiber of who we are: social creatures who depend on relationships with each other. The crisis has also exposed a number of shortcomings in both the developed and the developing countries in which the Open Medical Institute (OMI) operates, including a lack of pandemic preparedness, a delay in recognizing the threat, a failure to react quickly, insufficient medical infrastructure,

a shortage of trained healthcare professionals, and, above all, insufficient coordination between world governments.

Through it all, the world has been looking to medical professionals, public health institutions and scientists for reassurance and answers. OMI's mission to improve the human condition by addressing the shortage of trained healthcare professionals is more relevant today than ever before. It does so by providing advanced training and teaching new skills to medical professionals enabling them to provide better health care to people in need.

It is this mission that inspired my wife Almudena and me to launch Alianza Médica para la Salud in Mexico in 2010 with the goal of improving the quality of healthcare in our native Mexico. I am deeply grateful to Wolfgang, OMI and its academic partners, who have welcomed the participation of Mexican and Latin American doctors in OMI's programs. To date, 2,329 Mexican doctors have participated in OMI Salzburg Seminars, Observerships and Satellite Symposia.

In 2017, OMI showed extraordinary foresight when, in partnership with France's Institut Pasteur, one of the foremost research centers dedicated to the study of biology, micro-organisms, diseases, and vaccines, it launched a series of Salzburg seminars to train healthcare professionals on pandemic preparedness and response. As a result of this partnership, over 60 public health professionals and doctors have had the opportunity to receive advanced training on how to address the challenges brought upon us by the global coronavirus outbreak. Pasteur and OMI remain committed to this important initiative. OMI's proven ability to share medical knowledge through seminars, observerships and e-learning programs is uniquely suited to the needs of physicians from countries in transition – a significant unmet need. Improving the quality of healthcare in these countries requires leadership and the kind of coordination between resources and unmet needs that OMI specializes in. But OMI would not be able to advance its mission without the generous support and participation of many leading US and Austrian academic centers and the dedication and generosity of the many faculty members who serve pro-bono – they are the very backbone of the OMI's programs.

On behalf of the Board of Trustees, I wish to thank all past, present and future course

directors and faculty members who share their unique knowledge and expertise with thousands of young doctors that participate every year in OMI's programs. We have enormous respect and deep gratitude for all of your efforts. Thank you for your commitment to OMI's vision, and your tremendous sacrifice and hard work. You truly make a difference!

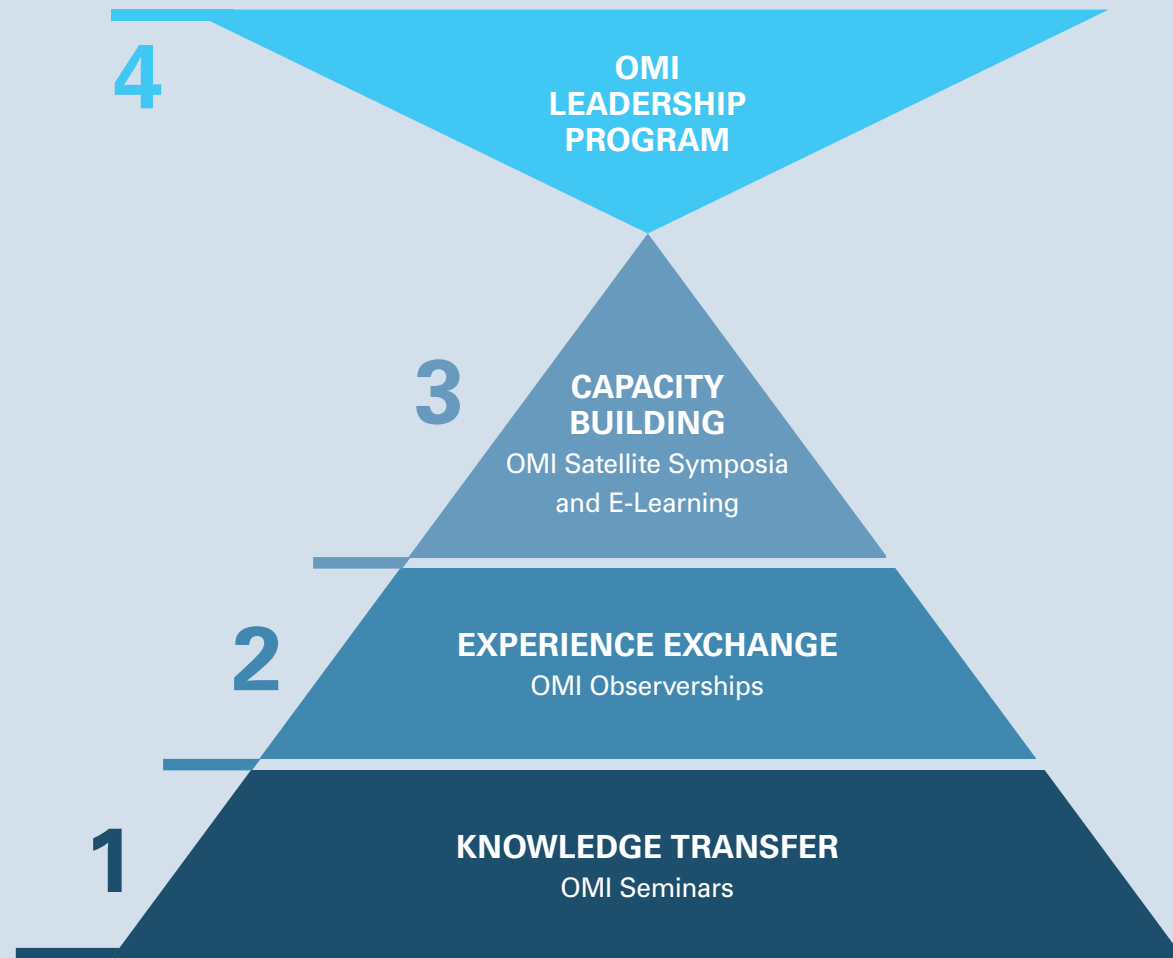

As we look to the future, I am confident that the American Austrian Foundation and the Open Medical Institute will emerge from this crisis as better, stronger and even more resilient organizations.

PABLO LEGORRETA

CEO, Royalty Pharma | Honorary President and Founder, Alianza Médica para la Salud

OMI 4-Step Approach

Open Medical Institute

What we do

The Open Medical Institute (OMI) is a medical educational program, whose aim is to promote brain gain and improve health care in countries in transition. The OMI was founded in 1993 by the American Austrian Foundation and the Open Society Foundations (OSF) in close collaboration with physicians from Weill Cornell Medical College and the Salzburg General Hospital. In the past 25 years, many other prestigious medical institutions in the US and Europe have joined this initiative providing academic leadership and expertise pro bono. The OMI follows a 4-step approach offering access to state-of-the-art medical knowledge through one-

week seminars in different medical specialties; experience exchange through one-month observerships at Austrian and American medical institutions and capacity building through local symposia, visiting professorships and e-learning. To complement the clinical education and enable OMI alumni to take on leadership positions, the OMI offers a fourth step: a multi-disciplinary leadership program, which includes medical education and leadership, hospital management, public health law and biomedical research. The OMI fosters medical alliances, enabling physicians to improve their daily practice and deliver the best possible care to their patients.

OMI MISSION STATEMENT

I mprove Health Globally
M inimize Brain Drain
P romote Brain Gain
A ccess to State-of-the-Art Medicine
C ontinuous Mentorship
T each Future Healthcare Leaders

"Medical outreach programs like the OMI are so important. The quality of this program was really impressive and I am confident that the participants benefited from it. You should be very proud of your work!"

OMI Seminars Knowledge Transfer

The first step in OMI's educational program consists of knowledge transfer through the OMI Seminars, which are offered in many different medical specialties. Highly qualified, mid-career level, English-speaking physicians, who undergo a rigorous selection process, are selected for up to three one-week seminars in their medical specialty. Fellowships are awarded based on merit. The majority of participants

(fellows) come from countries with poor medical infrastructure in Central and Eastern Europe, Central Asia, Russia, Africa and Mexico. Each seminar is limited to a maximum of 36 participants, allowing for intense interaction and knowledge transfer through lectures, discussions, case presentations, hands-on training, simulations, and grand rounds via videoconferencing.

Temporal Bone Laboratory during the OMI Seminar in Otology and Temporal Bone Surgery 2019

Seminar Highlights

HANDS-ON TRAINING

Modern teaching methods and hands-on training have become an important part of the OMI Seminars, exposing fellows to the newest surgical techniques and best practices. In 2019, 20 OMI Seminars provided hands-on workshops, the Cardiac Surgery and Temporal Bone Surgery Seminars included cadaver labs, the Neurosurgery Seminar offered a research laboratory for microsurgical neuroanatomy and the ESU Masterclass in Urology provided laparoscopic training.

“The complex temporal bone anatomy was explained in 3D by using a special software with 3D-glasses. I have never experienced such an efficient way of learning anatomy.”

Alice Auinger, M.D.
Austria, OMI Fellow of the Salzburg Weill Cornell Temporal Bone Surgery Seminar 2019

Faculty and Fellows of the Salzburg Institut Pasteur Seminar 2019: Global Health: Vector Borne Diseases

GLOBAL HEALTH – INSTITUT PASTEUR

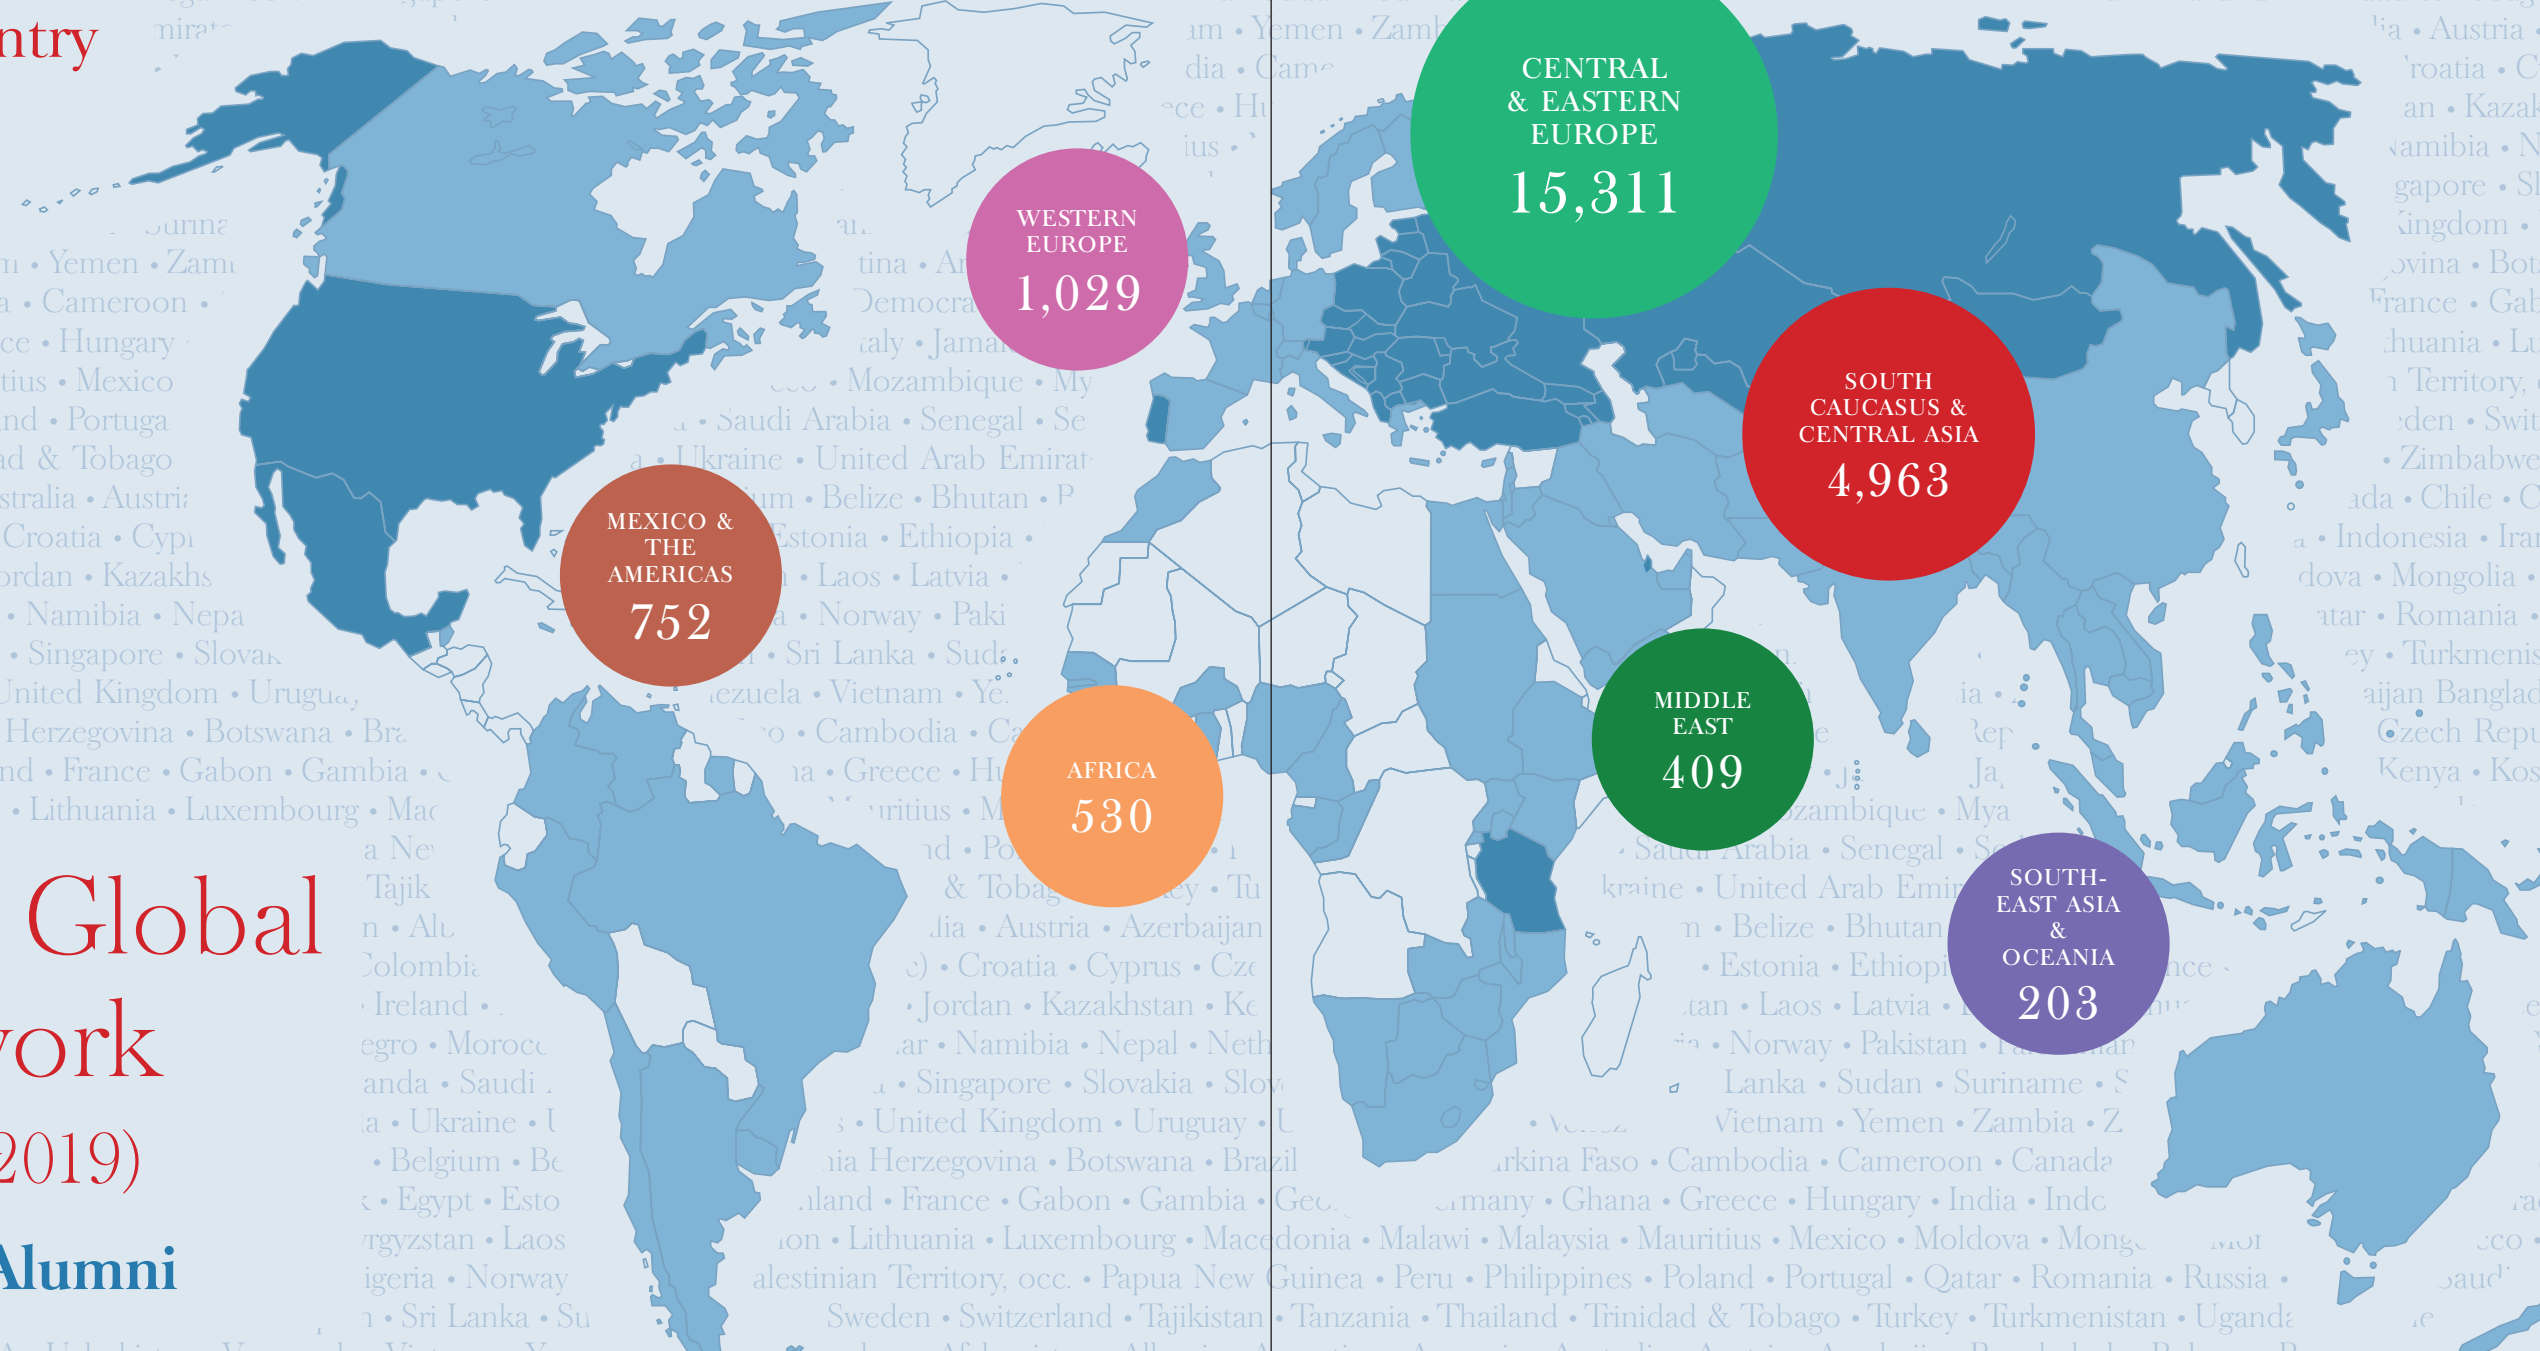

Following a successful joint seminar in Pandemics in 2017, the OMI and the Institut Pasteur, Paris continued the Global Health seminar series with a course on Vector-Borne Diseases in 2019.

34 fellows from 30 different countries attended the seminar’s lectures, conferences and round table discussions and broadened their knowledge on medical entomology and preparedness for pandemics.

“I appreciate the mentality, the spirit and the enthusiasm of young researchers and that they share it with us. I will never forget this experience. I gained new knowledge and made new friends!”

OMI Observerships Experience Exchange

The second step in OMI's educational program consists of clinical training in Austrian and US hospitals. All successful OMI Seminar participants are eligible for up to three one-month observerships to improve their clinical skills, learn new techniques, treatment protocols and experience modern hospital and healthcare management.

CLINICAL OBSERVERSHIPS

Observers inform us what they want to learn, rotate through departments of their interest and are mentored by world renowned experts. At the end of their observerships, fellows must submit a comprehensive report and a case study, prepared in cooperation with their mentor. They are able to

establish long-term relationships and research collaborations with their Austrian colleagues and their respective institutions.

RESEARCH OBSERVERSHIPS

OMI also offers research observerships, which provide basic biomedical and clinical research skills training. OMI Seminar alumni have the opportunity to spend three months in leading research institutions, where they can participate in research projects and further develop their research skills. This program is designed to foster the professional development of clinicians, interested in science and research, and help them build a professional network for future research collaborations.

OMI Satellite Symposia

The third step of OMI's educational program is dedicated to building local capacity. OMI alumni organize satellite symposia and visiting professorships by inviting OMI faculty to their home institutions, reaching a larger audience of local physicians and fostering relationships between senior physicians from the region and OMI faculty. All registered participants receive an official certificate issued by the participating international academic institutions. Since 2000, 252 satellite symposia and visiting professorships have taken place in 30 different countries.

OMI Satellite Symposium
in Tanzania

OMI faculty members Mesut Remzi, M.D. and Cornelia Radon, M.D. from the Medical University of Vienna visited the Benjamin Mkapa Hospital, the new university hospital in Dodoma, Tanzania. During their 10-day visit, they held lectures and hands-on training workshops in laparoscopic surgery and consulted on how to conduct clinical research and publish scientific papers. 24 participants including general surgeons, urologists, residents and operating theatre nurses joined the symposium.

OMI Satellite Symposium
in Montenegro

Elvir Zvirko, M.D., OMI alumnus and local coordinator in Montenegro, organized an international symposium in Otolaryngology with OMI faculty member Gerd Rasp, M.D. from the General Hospital in Salzburg as well as other faculty members from Montenegro, Serbia and Bosnia and Herzegovina.

The OMI event was the highlight of 2019 for the medical community in Montenegro.

E-Learning

The OMI provides numerous distance learning opportunities to promote capacity building in the home countries of our alumni, including:

The OMI Handbook Online – an educational resource containing all the scientific content of the OMI Seminars. OMI alumni have free access to this online platform and the content is updated regularly.

The OMI Case Library – a medical database, which includes clinical cases presented by fellows during the OMI Seminars.

CHOP OPEN – an online platform, which provides free up-to-date pediatric medical education. The modules are dedicated to a specific pediatric subspecialty consisting of lectures and cases presented during the weeklong OMI CHOP Seminars in Salzburg. The platform is supported by a generous grant from the Leir Foundation and is a joint initiative of the Children’s Hospital of Philadelphia and the OMI.

Success Stories and Testimonials

Victor Hugo Borja Aburto, M.D.
OMI Seminar: Pandemics 2017

Victor Hugo Borja Aburto, a fellow of the OMI Seminar in Pandemics became Director of Medical Benefits of the Mexican Institute for Social Security (IMSS), responsible for the healthcare of more than 70 million Mexicans. He is also a member of the National Academy of Medicine in Mexico and the National Council of Public Health.

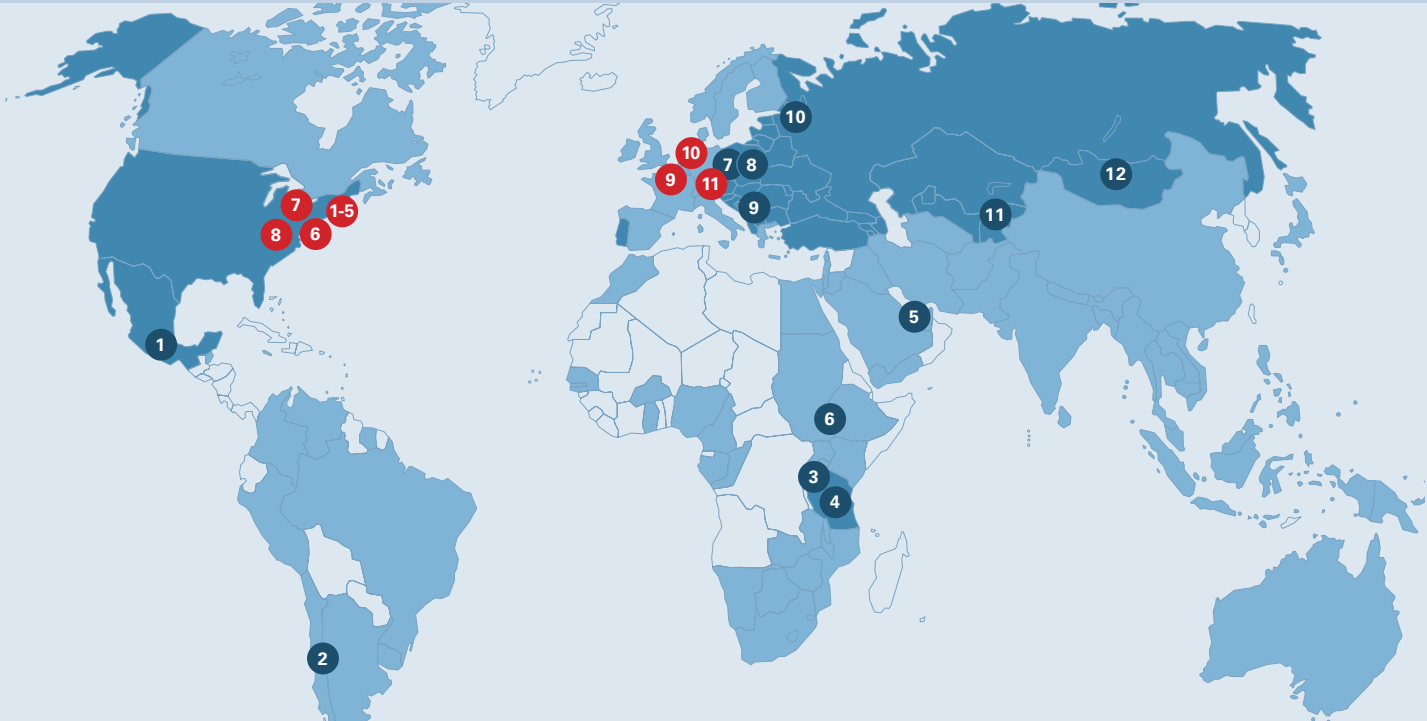

Ana Laura Arenas Díaz, M.D.
OMI Seminar: Pediatric Orthopedics 2019

"I'm sure that the skills that I've gained from this seminar and workshop will help me in my future work. This program provides young doctors with the great opportunity to gain tons of knowledge from world class experts, and at the same time meet colleagues from across the globe."

José Alfonso Gutiérrez Frusch, M.D.
OMI Seminar: Reproductive Medicine 2019

"I would like to thank everyone who attended this OMI Seminar! We established good friendships, but we also realized that medicine is a real effort where problems and achievements are similar throughout the world. Thanks to the whole team of professors who donated their time to share with us some of their knowledge, to Dr. Zev Rosenwaks, his Weill Cornell team and the team of the University of Austria."

Webinars in Mongolia

In 2019, OMI alumni and the Open Medical Club in Mongolia presented their new knowledge and experiences gained at the OMI Seminars to colleagues throughout Mongolia through online videos. 13 videos have been published to date, including lectures from fellows of the 2019 OMI Seminars in Infectious Diseases, Pathology and Maternal & Infant Health.

OMI-OSF Initiative Against Brain Drain: Centers of Excellence

In 2019, the OMI and OSF held an expert meeting with medical professionals from Central and Eastern Europe to design a program to reduce brain drain in Hungary, Romania, Serbia and Slovakia. The action plan includes creating Centers of Excellence, facilitating conferences in the target countries and providing more slots for physicians from those countries to participate in OMI activities.

Reception at the Austrian Embassy in Prague, Czech Republic

OMI alumni Nurbek Monolov, M.D., Salamat Murzabaeva, M.D., Kunduza Karbozova, M.D. and Asel Jusupova, M.D.

Olga Havel Foundation

On May 22, 2019 the Austrian Embassy in Prague hosted a reception to celebrate the fruitful collaboration between the Olga Havel Foundation and the Open Medical Institute.

Alexander Grubmayr, Ambassador of Austria to the Czech Republic, Monika Granja, Director of the Committee of Good Will – Olga Havel Foundation as well as 27 OMI alumni joined the celebrations.

Tenth Anniversary of the OMC Kyrgyzstan

2019 marked not only the 10th anniversary of the Open Medical Club (OMC) Kyrgyzstan, but also a very successful year: With the Debating Club and the “Sunday Lunch with...” two networking platforms were launched and OMI alumni Nurbek Monolov, M.D. (Urology), Kunduza Karbozova, M.D. (Neurology) and Nurgul Moldobaeva, M.D. (Anesthesiology) were awarded with the “National Medicine Awards” for their contribution to the development of medicine in Kyrgyzstan.

Catharina Müller, M.D. during her Andlinger Fellowship at NewYork Presbyterian Hospital

Bilateral Exchange Programs

Andlinger Residency Exchange Program

The Andlinger Residency Exchange Program supports training for Austrian and American medical residents at OMI partner institutions. Medical residents are encouraged to do rotations in American and Austrian hospitals to supplement their education and to broaden their experiences through exposure to a foreign healthcare system. Since 1992, more than 185 medical residents from Austria and the U.S.A. successfully participated in this bilateral exchange.

“The way of actively training and supporting residents and fellows has changed my thinking and will have an impact on my personal approach at work back in Austria.”

Sebastian Roesch, M.D.
Andlinger Fellow in ENT at the New York Presbyterian Hospital, U.S.A.

Max Kade Fellows in Austria in April 2019

Max Kade Clinical Clerkships Program

The Max Kade Clinical Clerkships Program offers one-month clinical clerkships to American and Austrian medical students from partner institutions of the OMI.

To date, this program, jointly funded by the Max Kade Foundation and the American Austrian Foundation, has awarded 513 fellowships to American medical students for clinical rotations in Austria and 143 fellowships to Austrian medical students for clinical rotations in the U.S.A.

“The Fellowship has been extremely educational! I believe due to this experience I will actively seek out more opportunities in my professional life to be exposed to foreign medical systems to continue learning.”

James Cook
Max Kade Fellow
in Anesthesia at the Medical University of Vienna

Hugh C. Hemmings, Jr., M.D.

Klaus Markstaller, M.D.

Humes Visiting Professorships

The Humes Visiting Professorship program was established to strengthen the relationship between Weill Cornell Medicine and Austrian academic institutions, whose faculty jointly conduct the Open Medical Institute’s seminar program. The visiting professorships are a bequest by the estate of the late AAF trustee and Cornell Medical University graduate, Jean Humes, M.D., in memory of her husband, John P. Humes, a

former US Ambassador to Austria and the first president of the American Austrian Foundation.

OMI course directors of the Anesthesiology Seminars, Hugh C. Hemmings, Jr., M.D., Weill Cornell Medical College, New York, USA, and Klaus Markstaller, M.D., Medical University of Vienna, Austria, were awarded the Humes Professorships for an exchange in 2020.

OMI Builds Careers

Veronika Skvortsova, M.D.
Russia

Veronika Skvortsova, M.D. attended one of the first OMI Seminars in Neurology. She was one of the founders of the National Association for the Fight Against Stroke and Director of the Research Institute for Stroke in the Russian National Research Medical University before she was appointed Minister of Health of the Russian Federation from 2012 until January 2020.

Enrique Soto, M.D.
Mexico

Enrique Soto, M.D., a geriatric oncologist and researcher in the Department of Geriatrics at the Instituto Nacional de Ciencias Médicas y Nutrición Salvador Zubirán in Mexico City and OMI alumnus in Oncology was elected to the Board of the American Society of Clinical Oncology.

Ernst Kuchar, M.D.
Poland

Ernst Kuchar, M.D. has attended five OMI Seminars and one OMI Observership in Pediatrics. He is now Head of the Pediatric Department of the Medical University in Warsaw, Poland and encourages young doctors to take part in the OMI programs.

Dmitry Nitkin, M.D.
Belarus

Dmitry Nitkin, M.D. has attended three OMI Seminars in Urology and Medical Education and completed a one-month OMI Observership. He was Head of Department of Urology of the Belarusian Medical Academy for Postgraduate Education (BelMAPE) and has recently been appointed Rector of BelMAPE.

Rahima Gabulova, M.D.
Azerbaijan

Rahima Gabulova, M.D. who is one of the most active OMI fellows from Azerbaijan has attended three OMI Seminars in Cardiology as well as four OMI Leadership Seminars. She has completed two OMI Observerships and organized several Satellite Symposia in Baku, Azerbaijan. In 2019, she was appointed Medical Director of the Institute of Sport and Rehabilitation Medicine.

Members of the Vienna Philharmonic Orchestra

Music for Medicine

The 2019 Music for Medicine Benefit Concert took place on December 12. The outstanding brass ensemble of the Vienna Philharmonic Orchestra (Trombone: Johannes Ettlinger, Johann Ströcker, Enzo Turriziani, Trumpets: Stefan Haimel, Jürgen Pöchhacker, Hans Peter Schuh, Tuba: Paul Halwax) performed at Zankel Hall at Carnegie Hall in New York City. The evening raised a total of \$670,410 and will support the OMI Seminars in Salzburg. We would like to thank the musicians, faculty members, our academic partners and the AAF board for their support.

Vienna School of Medicine Gala

The 2019 Vienna School of Medicine Gala took place on November 11th at the Van Swieten Saal of the Medical University of Vienna. This year’s program was dedicated to Obstetrics, Gynecological Oncology and Reproductive Medicine. Drs. Peter Husslein, Herbert Kiss, Christian Singer and Michael Feichtinger, who are leading experts in these fields, gave the audience valuable insights. A record number of 285 guests celebrated the achievements and honored past and current scientific contributions of Viennese physicians. The money raised will

support OMI fellowships for physicians from countries in transition and OMI Satellite Symposia with faculty and mentors from Vienna. Wolfgang Aulitzky, M.D. and Rector Markus Müller, M.D. presented the OMI Outstanding Faculty Member Award to Wolfgang Graninger, M.D. and Franz Kainberger, M.D. Peter Husslein, M.D. received the OMI Honorary Award for his exceptional contributions to the Open Medical Institute and Wolfgang Aulitzky, M.D., Medical Director of the OMI, was awarded the Badge of Honor of the Medical University of Vienna.

Funding Partners & Sponsors

The American Austrian Foundation (AAF) and the Open Medical Institute (OMI) are profoundly grateful to our sponsors and the many others who support our work.

Total OMI Observership Expenses	\$ 628.932

This financial report represents income and expenses per December 31, 2019 (average exchange rate for 2019: 1 EUR = 1.12 USD). The OMI Seminars and Observerships are organized by the American Austrian Foundation (AAF) in cooperation with the Salzburg Stiftung of the AAF and the Association of Friends of the AAF. This financial report does not include the value of faculty time and other in-kind donations.

The American Austrian Foundation

The American Austrian Foundation (AAF) is a non-profit, non-governmental organization established in 1984 to enhance the relationship between the United States and Austria through exchanges in medicine, media and the arts. The AAF has grown from a bilateral initiative to a multilateral, international institution partnering with non-governmental organizations, governments and individuals, directed by committed board members. From modest beginnings, the AAF's annual budget now exceeds \$5 million and is drawn from public and private sources. The Salzburg Stiftung of the AAF and the Association of Friends of the AAF were founded to assist the AAF with the implementation of its programs in Austria and Europe.
